

Executive Profile

Growth and commercialization executive, founder, and operator working across energy markets, climate infrastructure, AI, and emerging financial and technology platforms. Experience building 0-to-1 ventures, shaping go-to-market and partnership strategy, leading cross-functional teams, and translating complex market and technology theses into commercial narratives, operating priorities, and measurable growth. MPA in Environmental Science & Policy from Columbia University.

Professional Experience

Head of Growth | Refinery

January 2026 – Present

- Lead growth, market positioning, brand, partnerships, operations, and agentic engineering for a stealth AI micro-data-center startup.
- Help define commercialization and go-to-market strategy for an emerging AI infrastructure platform, working across product narrative, market development, and execution.

Founder & CEO | Gaia AI + Symbiocene Labs

Founded December 2024

- Founded an edge-AI laboratory focused on a universal planetary environmental data layer and regenerative finance; built and lead a full-time developer team.
- Secured a five-figure MRR engagement with Regen Network to provide AI and movement-building services; own strategy, partnerships, positioning, and ecosystem development.
- Presented the work at the United Nations and built relationships across climate, regenerative finance, AI, and emerging-technology ecosystems.

Head of Growth | Power Finance

January 2025 – December 2025

- Led growth, brand, marketing, and partnerships for a venture developing a yield-bearing synthetic dollar backed by the U.S. electricity market.
- Helped translate novel energy-finance architecture into market positioning, partner strategy, ecosystem development, and commercialization.
- Worked across product narrative, nomenclature, design, partnerships, and front-of-house execution in a highly technical, early-stage environment.

Selected Energy + Climate Strategy

Electron Economy | Montauk Climate

Selected strategic work

- Contributed to work around the Electron Economy and the structural evolution of energy markets, complementing operating experience across renewable energy, energy finance, and climate technology.

Head of Marketing / De Facto Head of Growth & Marketing | Daylight Energy

June 2024 – December 2025

- Led growth, brand, marketing, operations, user acquisition, and community engagement for a renewable-energy and Web3 platform.
- Executed cross-functional campaigns across Layer3, Galxe, social, and community channels to expand reach, engagement, and brand presence.
- Developed thought leadership and market-facing content positioning Daylight at the intersection of regenerative technology, renewable energy, and emerging digital infrastructure.

Professional Experience, Continued

Head of Community | **Worldcoin**

January 2023 – June 2024

- Worked on a small marketing team that grew X from approximately 15K to 200K+, LinkedIn from under 2K to 10K+, Telegram from 3K to 15K, and Discord from 5K to 50K.
- Hired and managed five moderators and advocates globally, with direct responsibility for team performance and community operations.
- Oversaw signup events in Berlin, New York, and Tokyo, including contractor management, event coordination, reporting, and KPI tracking.

Community Manager | **Forta Network**

October 2021 – January 2023

- Built and managed a 35K+ member Discord, 16K+ X audience, and an ambassador network spanning more than 20 countries.
- Worked with investors and partner teams across the crypto ecosystem, including Aave, Compound, and OpenSea; developed strong CRM and remote-team operating discipline.
